CITES Protected Plants

Contents

Introduction [page F-1](#)
Alphabetical List of CITES Protected Plants [page F-2](#)
Designated Ports [page F-25](#)

Introduction

This Appendix lists plants protected by the Convention for International Trade in Endangered Species of Fauna and Flora (CITES). At the end of this Appendix is a list of ports which are designated for the importation of plants protected by ESA and CITES.

When applying endangered species legislation, apply the regulations that prevent the entry of plant pests first (Plant Protection Act).

If:	And:	Then:
Ginseng	→	SEE page 5.95 of this manual
Other than ginseng	Entering at a designated port listed in 50CFR part 24 (reproduced at the tail end of this Appendix)	Take action(s) under plant quarantines and plant pest regulations first; then regulate under CITES or ESA as appropriate
	Not entering at a designated port	Give the exporter one of the following options: ◆ Reexport the articles to the country of origin; or ◆ Reroute the article(s) to a designated port (if appropriate, safeguard under plant quarantines and plant pest regulations first). Shipping and handling charges to be borne by the importer.

Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Agave arizonica</i> (Arizona agave)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	AGAVACEAE (Agaves)
<i>Agave parviflora</i> (small-flowered agave)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	AGAVACEAE (Agaves)
<i>Agave victoriae-reginae</i> #1 (Queen Victoria agave)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	AGAVACEAE (Agaves)
<i>Nolina interrata</i> (Dehesa beargrass)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	AGAVACEAE (Agaves)
<i>Galanthus</i> spp. #1 (snowdrops)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	AMARYLLIDACEAE (Sternbergias or Snowdrops)
<i>Sternbergia</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	AMARYLLIDACEAE
<i>Pachypodium</i> spp. (Except the species included in Appendix I)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	APOCYNACEAE (Elephant trunks)

Sci/Common Name	Parts/Annotations	App	Family
<i>Pachypodium ambongense</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	APOCYNACEAE (Elephant trunks)
<i>Pachypodium baronii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.		APOCYNACEAE (Elephant trunks)
<i>Pachypodium decaryi</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.		APOCYNACEAE (Elephant trunks)
<i>Rauvolfia serpentina</i> (serpentine root)	All parts and derivatives, except: ◆ seeds and pollen; ◆ seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers; ◆ cut flowers of artificially propagated plants; and ◆ chemical derivatives and finished pharmaceutical products	II	APOCYNACEAE (Elephant trunks)
<i>Panax ginseng</i> #3 (ginseng)	Designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives such as powders, pills, extracts, tonics, teas and confectionery	II	ARALIACEAE (Ginseng)
<i>Panax quinquefolius</i> #3 (American ginseng)	Designates whole and sliced roots and parts of roots, excluding manufactured parts or derivatives such as powders, pills, extracts, tonics, teas and confectionery	II	ARALIACEAE (Ginseng)
<i>Araucaria araucana</i> (monkeypuzzle tree)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.		ARAUCARIACEAE (Monkey-puzzle tree)
<i>Podophyllum hexandrum</i> (Himalayan mayapple)	All parts and derivatives, except: ◆ seeds and pollen; ◆ seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers; ◆ cut flowers of artificially propagated plants; and ◆ chemical derivatives and finished pharmaceutical products	II	BERBERIDACEAE (May-apple)
<i>Tillandsia harrisii</i> (airplants)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)

Appendix F: CITES Protected Plants
 Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Tillandsia kammii</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
<i>Tillandsia kautskyi</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
<i>Tillandsia mauryana</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
<i>Tillandsia sprengeliana</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
<i>Tillandsia suerei</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
<i>Tillandsia xerographica</i> (airplant)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	BROMELIACEAE (Air plants, bromelias)
CACTACEAE spp. #4	Designates all parts and derivatives, except: ◆ seeds, except those from Mexican cacti originating in Mexico, and pollen; ◆ seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers; ◆ cut flowers of artificially propagated plants; ◆ fruits and parts and derivatives thereof of naturalized or artificially propagated plants; and ◆ separate stem joints (pads) and parts and derivatives thereof of naturalized or artificially propagated plants of the genus <i>Opuntia</i> subgenus <i>Opuntia</i> .	II	CACTACEAE (Cacti)

Sci/Common Name	Parts/Annotations	App	Family
<i>Ariocarpus</i> spp. (living rocks of Mexico)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Astrophytum asterias</i> (sand dollar)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Aztekium ritteri</i> (aztekium)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Coryphantha werdermannii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Discocactus</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Echinocereus ferreirianus</i> ssp. <i>lindsayi</i> (hedgehog cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Echinocereus schmollii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Escobaria minima</i> (Nelly Cory cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)

Appendix F: CITES Protected Plants
Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Escobaria sneedii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Mammillaria pectinifera</i> (sneed pincushion cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Mammillaria solisioides</i> (pitayita)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Melocactus conoideus</i> (turk's cap)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Melocactus deinacanthus</i> (turk's cap)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Melocactus glaucescens</i> (woolly waxy stem turk's cap)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Melocactus paucispinus</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Obregonia denegrii</i> (artichoke cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)

Sci/Common Name	Parts/Annotations	App	Family
<i>Pachycereus militaris</i> (hairbrush cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pediocactus bradyi</i> (Brady pincushion cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pediocactus knowltonii</i> (knowlton cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pediocactus paradinei</i> (kaibab pincushion cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pediocactus peeblesianus</i> (Peebles Navaho cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pediocactus sileri</i> (siler pincushion cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Pelecyphora</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus brevihamatus</i> ssp. <i>tobuschii</i> (Nelly's cory cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)

Appendix F: CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Sclerocactus erectocentrus</i> (needle spined pineapple cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus glaucus</i> (Uinta basin hookless cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus mariposensis</i> (Lloyd's mariposa cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus mesae-verdae</i> (Mesa-Verde cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus nyensis</i> (tonapah fishhook cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus papyracanthus</i> (gramma grass cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus pubispinus</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Sclerocactus wrightiae</i> (Wright fishhook cactus)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)

Sci/Common Name	Parts/Annotations	App	Family
<i>Strombocactus</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Turbinicarpus</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Uebelmannia</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CACTACEAE (Cacti)
<i>Caryocar costaricense</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	CARYOCARACEAE (Ajo)
<i>Saussurea costus</i> (Costas root oil)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	COMPOSITAE (Kuth)
<i>Dudleya stolonifera</i> (Laguna beach liveforever)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	CRASSULACEAE (Dudleyas)
<i>Dudleya traskiae</i> (Santa Barbara Island liveforever)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	CRASSULACEAE (Dudleyas)
<i>Fitzroya cupressoides</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CUPRESSACEAE (Alerce, cypresses)

Appendix F: CITES Protected Plants
Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Pilgerodendron uviferum</i> (pilgerodendron)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CUPRESSACEAE
<i>Cyathea</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	CYATHEACEAE (Tree-ferns)
CYCADACEAE spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	CYCADACEAE (Cycads)
<i>Cycas beddomei</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	CYCADACEAE (Cycads)
<i>Shortia galacifolia</i> #1 (Oconee bells)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DIAPENSIACEAE (Oconee-bells)
<i>Cibotium barometz</i> #1 (cibotium)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DICKSONIACEAE (Tree-ferns)
<i>Dicksonia</i> spp. #1 (Only the populations of the Americas; no other population is included in the Appendices)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DICKSONIACEAE (Tree-ferns)
DIDIEREACEAE spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DIDIEREACEAE (Alluaudias, didiereas)

Sci/Common Name	Parts/Annotations	App	Family
<i>Dioscorea deltoidea</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DIOSCOREACEAE (Elephant's foot, kniss)
<i>Dionaea muscipula</i> #1 (Venus fly trap)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	DROSERACEAE (Venus' flytrap)
<i>Euphorbia</i> spp. #1 (Except the species included in Appendix I; succulent species only; artificially propagated specimens of cultivars of <i>Euphorbia trigona</i> are not subject to the provisions of the Convention)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	EUPHORBIACEAE (Spurges)
<i>Euphorbia ambovombensis</i> (cosmos)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia capsaintemariensis</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia cremersii</i> (Includes the <i>forma viridifolia</i> and the var. <i>rakotozafyi</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia cylindrifolia</i> (Includes the spp. <i>tuberifera</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia decaryi</i> (Includes the vars. <i>ampanihyenis</i> , <i>robinsonii</i> and <i>spirosticha</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)

Appendix F: CITES Protected Plants
Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Euphorbia francoisii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia moratii</i> (Includes the vars. <i>antsingiensis</i> , <i>bemarahensis</i> and <i>multiflora</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia parvicyathophora</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia quartziticola</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Euphorbia tulearensis</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	EUPHORBIACEAE (Spurges)
<i>Fouquieria columnaris</i> #1	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	II	FOUQUIERIACEAE (Ocotillos)
<i>Fouquieria fasciculata</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	FOUQUIERIACEAE (Ocotillos)
<i>Fouquieria purpusii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	FOUQUIERIACEAE (Ocotillos)

Sci/Common Name	Parts/Annotations	App	Family
<i>Gnetum montanum</i> #1 (Nepal)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	III	GNETACEAE (Gnetums)
<i>Oreomunnea pterocarpa</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	JUGLANDACEAE Gavilan
<i>Dalbergia nigra</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LEGUMINOSAE (Fabaceae) (Afrormosia, cristobal, rosewood, sandalwood)
<i>Dipteryx panamensis</i> (Costa Rica)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	III	LEGUMINOSAE (Fabaceae) (Afrormosia, cristobal, rosewood, sandalwood)
<i>Pericopsis elata</i> #5	Designates logs, sawn wood and veneer sheets.	II	LEGUMINOSAE (Fabaceae) (Afrormosia, cristobal, rosewood, sandalwood)
<i>Platymiscium pleiostachyum</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	LEGUMINOSAE (Fabaceae) (Afrormosia, cristobal, rosewood, sandalwood)
<i>Pterocarpus santalinus</i> #7	Designates logs, wood-chips and unprocessed broken material.	II	LEGUMINOSAE (Fabaceae) (Afrormosia, cristobal, rosewood, sandalwood)
<i>Aloe</i> spp. #1 (Except the species included in Appendix I. Also excludes <i>Aloe vera</i> , also referenced as <i>Aloe barbadensis</i> which is not included in the Appendices)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	I	LILIACEAE (Aloes)

Appendix F: CITES Protected Plants
Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
Aloe albida	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe albiflora	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe alfredii	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe bakeri	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe bellatula	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe calcaireophila	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Aloe compressa</i> (Includes the vars. <i>rugosquamosa</i> , <i>schistophila</i> and <i>paucituberculata</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe delphinensis	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)

Sci/Common Name	Parts/Annotations	App	Family
Aloe descoingsii	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe fragilis	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe haworthioides (Includes the var. <i>aurantiaca</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe helenae	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe laeta (Includes the var. <i>maniaensis</i>)	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe parallelifolia	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe parvula	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
Aloe pillansii	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)

Appendix F: CITES Protected Plants
Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Aloe polyphylla</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Aloe rauhii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Aloe suzannae</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Aloe versicolor</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Aloe vossii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	LILIACEAE (Aloes)
<i>Magnolia liliifera</i> var. <i>obovata</i> #1 (Nepal)	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	III	MAGNOLIACEAE (Magnolia)
<i>Cedrela odorata</i> #5 [Population of Colombia (Colombia)Population of Peru (Peru)]	Designates logs, sawn wood and veneer sheets.	III	MELIACEAE (Mahoganies, Spanish cedar)
<i>Swietenia humilis</i> #1	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	II	MELIACEAE (Mahoganies, Spanish cedar)

Sci/Common Name	Parts/Annotations	App	Family
<i>Swietenia macrophylla</i> #5 (Until 15 November 2003) [Population of Bolivia (Bolivia) Population of Brazil (Brazil) All populations of the species in the Americas (Costa Rica) Population of Colombia (Colombia) Population of Mexico (Mexico) Population of Peru (Peru)]	Designates logs, sawn wood and veneer sheets.	III	MELIACEAE (Mahoganies, Spanish cedar)
<i>Swietenia macrophylla</i> #6 (Populations of the Neotropics) [Enters into effect on 15 November 2003]	Designates logs, sawn wood, veneer sheets and plywood.	II	MELIACEAE (Mahoganies, Spanish cedar)
<i>Swietenia mahagoni</i> #5	Designates logs, sawn wood and veneer sheets.	II	MELIACEAE (Mahoganies, Spanish cedar)
<i>Nepenthes</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	NEPENTHACEAE Pitcher-plants (Old World)
<i>Nepenthes khasiana</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	NEPENTHACEAE Pitcher-plants (Old World)
<i>Nepenthes rajah</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	NEPENTHACEAE Pitcher-plants (Old World)
ORCHIDACEAE spp. #8 (Except the species included in Appendix I) (For all of the following Appendix I species, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers are not subject to the provisions of the Convention)	Designates all parts and derivatives, except: a) seeds and pollen (including pollinia); b) seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers; c) cut flowers of artificially propagated plants; and d) fruits and parts and derivatives thereof of artificially propagated plants of the genus <i>Vanilla</i> .	II	ORCHIDACEAE Orchids

Appendix F: CITES Protected Plants

<i>Aerangis ellisii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Cattleya trianaei</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Dendrobium cruentum</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Laelia jongheana</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Laelia lobata</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Paphiopedilum</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Peristeria elata</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Phragmipedium</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids

Sci/Common Name	Parts/Annotations	App	Family
<i>Renanthera imschootiana</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Vanda coerulea</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ORCHIDACEAE Orchids
<i>Cistanche deserticola</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	OROBANCHACEAE Broomrape
<i>Beccariophoenix madagascariensis</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Chrysalidocarpus decipiens</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PALMAE (Arecaceae) Palms
<i>Lemurophoenix halleuxii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Marojejya darianii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Neodypsis decaryi</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PALMAE (Arecaceae) Palms

<i>Ravenea louvelii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Ravenea rivularis</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Satranala decussilvae</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Voanioala gerardii</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	PALMAE (Arecaceae) Palms
<i>Meconopsis regia</i> #1 (Nepal)	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	III	PAPAVERACEAE Poppy
<i>Abies guatemalensis</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	PINACEAE (Guatemala fir)
<i>Podocarpus neriifolius</i> #1 (Nepal)	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	III	PODOCARPACEAE (Podocarps)
<i>Podocarpus parlatorei</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	PODOCARPACEAE (Podocarps)

Sci/Common Name	Parts/Annotations	App	Family
<i>Anacampseros</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PORTULACACEAE Lewisias, portulacas, purslanes
<i>Avonia</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PORTULACACEAE Lewisias, portulacas, purslanes
<i>Lewisia serrata</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PORTULACACEAE Lewisias, portulacas, purslanes
<i>Cyclamen</i> spp. #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PRIMULACEAE Cyclamens
<i>Orothamnus zeyheri</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PROTEACEAE Proteas
<i>Protea odorata</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	PROTEACEAE Proteas
<i>Adonis vernalis</i> #2	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	RANUNCULACEAE Golden seals, yellow adonis, yellow root
<i>Hydrastis canadensis</i> #3	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	RANUNCULACEAE Golden seals, yellow adonis, yellow root

II	SCROPHULARIACEAE Kutki
<i>Bowenia</i> spp. #1	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	II	STANGERIACEAE Stangerias

Sci/Common Name	Parts/Annotations	App	Family
<i>Stangeria eriopus</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	STANGERIACEAE (Stangerias)
<i>Taxus wallichiana</i> #2	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	TAXACEAE (Himalayan yew)
<i>Tetracentron sinense</i> #1 (Nepal)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	III	TROCHODENDRACEAE (Tetracentraceae) (Tetracentron)
<i>Aquilaria malaccensis</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	THYMELAEACEAE (Aquilariaceae) (Agarwood, ramin)
<i>Gonystylus</i> spp. #1 (Indonesia)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	THYMELAEACEAE (Aquilariaceae) (Agarwood, ramin)
<i>Nardostachys grandiflora</i> #3	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	II	VALERIANACEAE (Himalayan spikenard)
<i>Welwitschia mirabilis</i> #1	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	WELWITSCHIACEAE (Welwitschia)
ZAMIACEAE spp. #1 (Except the species included in Appendix I)	All parts and derivatives, except: ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants.	II	ZAMIACEAE (Cycads)

Alphabetical List of CITES Protected Plants

Sci/Common Name	Parts/Annotations	App	Family
<i>Ceratozamia</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ZAMIACEAE (Cycads)
<i>Chigua</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ZAMIACEAE (Cycads)
<i>Encephalartos</i> spp.	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ZAMIACEAE (Cycads)
<i>Microcycas calocoma</i>	All parts. However, artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.	I	ZAMIACEAE (Cycads)
<i>Hedychium philippinense</i> #1	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	II	ZINGIBERACEAE (Ginger lily)
<i>Guaiacum</i> spp. #1	All parts and derivatives, except: <ul style="list-style-type: none"> ◆ seeds, spores and pollen (including pollinia); ◆ seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers; and ◆ cut flowers of artificially propagated plants. 	II	ZYGOPHYLLACEAE (Lignum-vitae)
